

Standard Parameters Register

Live comparison sheet for project parameters, code locations, document provenance, and verification status.

Status legend: verified = direct page/section match; unverified = no direct document match yet; project default = internal engineering assumption; needs review = likely related but mapping incomplete.

Area	Parameter	Value	Unit	Code location	Code claim	Document source	Page/section	Status	Notes
Clearance	Box width	3.0	m	tunnel_analysis/common.py:100, rag_ai.py:49	Korean railway clearance envelope	Not yet verified in a local standard PDF	Not found	unverified	Treat as project default until a proper clearance standard is linked.
Clearance	Box height	4.5	m	tunnel_analysis/common.py:101, rag_ai.py:49	Korean railway clearance envelope	Not yet verified in a local standard PDF	Not found	unverified	Same as above.
Clearance	Circle radius	4.0	m	tunnel_analysis/common.py:102	Internal app default	None yet	None	project default	App geometry constant, not a direct standard claim.
Settlement	Crown settlement caution	10	mm	tunnel_analysis/common.py:280, rag_ai.py:18	KR C-08080 summary	Current KR C-08080 PDF does not show this tunnel threshold	Not found	unverified	Must not be cited as confirmed by current PDF.
Settlement	Crown settlement critical	25	mm	tunnel_analysis/common.py:280, rag_ai.py:18	KR C-08080 summary	Current KR C-08080 PDF does not show this tunnel threshold	Not found	unverified	Same as above.
Convergence	Lateral convergence caution	15	mm	tunnel_analysis/common.py:281, rag_ai.py:22	Tunnel safety summary	Current KR C-08080 PDF shows bridge longitudinal displacement, not tunnel convergence	KR C-08080 p.14-15, sec. 5.1.3 (bridge)	needs review	Possible conceptual mismatch.
Convergence	Lateral convergence critical	30	mm	tunnel_analysis/common.py:281, rag_ai.py:23	Tunnel safety summary	Current KR C-08080 PDF shows ?30 mm for bridge longitudinal displacement	KR C-08080 p.14-15, sec. 5.1.3 (bridge)	needs review	Do not reuse as tunnel convergence until matched to tunnel document.
Ovality	Caution	0.5	%	tunnel_analysis/common.py:282, rag_ai.py:26	KDS 27 25 00 summary	Not yet verified in a local standard PDF	Not found	unverified	Needs a proper KDS tunnel source.
Ovality	Critical	1.0	%	tunnel_analysis/common.py:282, rag_ai.py:26	KDS 27 25 00 summary	Not yet verified in a local standard PDF	Not found	unverified	Needs a proper KDS tunnel source.
Eccentricity	Caution	10	mm	tunnel_analysis/common.py:283, rag_ai.py:38	KDS 27 25 00 summary	Current KR C-08080 PDF shows 10 mm in bridge end displacement context	KR C-08080 p.15, sec. 5.1.4 (bridge)	needs review	Source context does not match tunnel eccentricity.
Eccentricity	Critical	25	mm	tunnel_analysis/common.py:283, rag_ai.py:38	KDS 27 25 00 summary	Not yet verified in a local standard PDF	Not found	unverified	Needs a proper KDS tunnel source.
Clearance	Minimum clearance	always maintained	rule	rag_ai.py:47	Korean Railway Act Article 26	Not yet verified locally	Not found	unverified	Keep as a safety statement until a primary legal/source citation is linked.
QC	Registration RMSE target	< 2	mm	rag_ai.py	AI summary	Not yet verified locally	Not found	unverified	Treat as engineering target, not standard claim.
QC	Heatmap stable band	< 1	mm	rag_ai.py	AI summary	Not yet verified locally	Not found	project default	Useful visualization rule, not a standard requirement.
QC	Heatmap caution band	1-3	mm	rag_ai.py	AI summary	Not yet verified locally	Not found	project default	Useful visualization rule, not a standard requirement.
QC	Heatmap critical band	> 3	mm	rag_ai.py	AI summary	Not yet verified locally	Not found	project default	Useful visualization rule, not a standard requirement.
Algorithm	Outlier removal band	mu +/- 2.5 sigma	rule	rag_ai.py	algorithm note	None yet	None	project default	Internal preprocessing setting.
Algorithm	Voxel size quick preview	0.10	m	rag_ai.py	algorithm note	None yet	None	project default	Internal preprocessing setting.

Area	Parameter	Value	Unit	Code location	Code claim	Document source	Page/section	Status	Notes
Algorithm	Voxel size precision	0.02	m	rag_ai.py	algorithm note	None yet	None	project default	Internal preprocessing setting.
Algorithm	Voxel size high-density	0.05	m	rag_ai.py	algorithm note	None yet	None	project default	Internal preprocessing setting.
